Dutch (A2)

STORY

I worked for ten years in the Film and TV industry, a fast-paced, chaotic environment. I learned to grasp the essence of a project and translate what people need into action, fast and on budget, as well as to convey a complex situation as a coherent narrative, to allow quick decision making.

Today I am reinventing those skill; bringing structured creative thinking to technical problems and turning them into business solutions.

TOOLS

- **Python +** Pandas, Numpy, Matplotlib, Scikit-learn, Streamlit, FastAPI,...
- **SQL & Power BI +** Power-Query, DAX, Excel.
- **Cloud:** Azure, HTML, CSS, javascript.

PROJECTS

(project names correspond to GitHub repo's)

- **Market Watch Agent*:** *(Scraping, LLM use, complex architecture).*

For a leading Belgian bank, I led a team that built an automated solution for monitoring competitors products, surfacing differences as a dashboard and daily email brief.
*(*private repo per client's demand)*

- **Crop classification from satellite imagery:** *(Azure cloud, ML classifier).*

Built a classification model to identify crops from a set of sentinel-2 satellite images. Computed and stored in Azure cloud.

- **Immo-Eliza:** *(Scraping, Data-Analysis, ML prediction, deployment)*

Group project involving scrapping Immo-Vlan's website fo all properties for sale, analysing the data, then building a price predicting model and deploying it.

- **Arcelor Mittal PPE detection** *(ML/Computer Vision, cloud compute)*

Trained a YOLOv8 model for PPE detection on industrial footage — 85% mAP. Challenging on the data side,

- **Vivino:** *(SQL, Data-Analysis, Streamlit deployment)*

Data analysis of a wines database, done entirely in SQL.

EDUCATION

- **BeCode:** 7 months intensive bootcamp on Data Analysis, Data science, Data engineering. I went from some python to deploying ML models.
- **Intro to Business Intelligence:** PowerBi, SQL (Bxl Formation)
- **CodeCademy / Datacamp courses:** Python, Git&Bash, HTML&CSS, Javascript, SQL, ...

SKILLS

Excellent capacity for self-learning: Coding, English, Spanish, Photography, Woodworking,, Editing + VFX. Tea nerd, paraglider pilot.
